

Natural Resources Committee Members:

Please do not vote to pass Senate Bill 0078 (2013). This would be the beginning of the destruction of our beautiful state lands. Nobody wants to go to the state lands and see, logged off forests with scrappy brush growing and oil wells. This fragmentation, industrialization and exploitation of our state lands is wrong. I don't know if you have any appreciation of this natural beauty, but it is our responsibility to protect it. Find another way to make money.
